Fort Dix Unit training and Equipment Site

Facility and Location

Fort Dix Unit training and Equipment Site was utilized by the National Guard, is currently closed, and is in the process of being returned to Fort Dix. It was used as a maintenance location for tracked vehicles. There was never a range at the facility. There are ranges nearby, but not within the fence line.

Media Sampled and Findings

Drinking Water — In 2011, four of four samples detected perchlorate from 0.16 to 0.57 ppb.

Appropriate Actions

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
